| Week | Date | Material | Reference |
| :---: | :---: | :---: | :---: |
| 1 | 25-Feb-13 | 1. Approximation of Numbers on Computer. Errors. | K 19.1 |
|  |  | Round-off error. Truncation error. Propagation of errors. |  |
|  |  | Representation of functions. Catastrophic cancellation. |  |
|  |  |  |  |
| 2 | 4-Mar-13 | 2. Rootfinding: $f(x)=0$. Bracketing methods | K 19.2 |
|  |  | The bisection method. The "regula falsi" method. |  |
|  |  | Fixed-point iteration - convergence. | K 19.2 |
|  |  |  |  |
| 3 | 12-Mar-13 | The Newton-Raphson method. | K 19.2 |
|  |  | Convergence. The secant method. |  |
|  |  | 3. Solution of Matrix Equations $\mathbf{A x}=\mathbf{b}$. Gaussian elimination. | K 7.2, K 7.3 |
|  |  |  |  |
| 4 | 18-Mar-13 | Gaussian Elimination - Numerical implementation. | K 20.1 |
|  |  | Storing multipliers - LU decomposition of a matrix. | K 20.2 |
|  |  | Determinants. Pivoting strategies - PLU decomposition. | K 20.2 |
|  |  |  |  |
| 5 | 25-Mar-13 | Iterative solution of linear equations - Jacobi and Gauss-Seidel. | K 20.3 |
|  |  | Convergence of iterative methods. Norms, matrix norms. | K 20.3, K 20.4 |
|  |  |  |  |
|  |  | EASTER BREAK |  |
|  |  |  |  |
| 5 | 4-Apr-13 | III-conditioned systems. The condition number of a matrix. | K 20.4 |
|  |  |  |  |
| 6 | 8-Apr-13 | Newton's method for many equations. |  |
|  |  | 4. The Matrix Eigenvalue Problem. Introduction to eigenvalues. | K 8.1, K 8.2, K 20.6 |
|  |  | Gershgorin's circle theorem. The power method. | K 20.7, K 20.8 |
|  |  |  |  |
| 7 | 15-Apr-13 | Similar matrices have the same eigenvalues. Orthogonal matrices. | K 8.3, K 20.6 |
|  |  | Householder transformation to tri-diagonal form. | K 20.9 |
|  |  | The QR algorithm. | K 20.9 |
|  |  |  |  |
| 8 | 22-Apr-13 | 5. Interpolation. Polynomial interpolation. | K 19.3 |
|  |  | Lagrange interpolation. | K 19.3 |
|  |  |  |  |
| 9 | 29-Apr-13 | Newton polynomial and divided differences. | K 19.3 |
|  |  | Equally-spaced points - errors - Runge's example. |  |
|  |  | Cubic-spline interpolation. | K 19.4 |
|  |  |  |  |
| 10 | 6-May-13 | Constructing the cubic spline. End conditions. | K 19.4 |
|  |  | Properties of the cubic spline. |  |
|  |  | 6. Numerical integration and Differentiation. Trapezoidal rule. | K 19.5 |
|  |  |  |  |
| 11 | 13-May-13 | Simpson's rule. Errors. | K 19.5 |
|  |  | Newton-Cotes rules. |  |
|  |  | Gaussian quadrature. | K 19.5 |
|  |  |  |  |
| 12 | 20-May-13 | Numerical differentiation. | K 19.5 |
|  |  | 7. Numerical Solution of ODEs. Introduction. | K 21.1 |
|  |  | Euler's method. Local and global truncation error. |  |
|  |  |  |  |
| 13 | 27-May-13 | Heun's method. Taylor-series methods. | K 21.1 |
|  |  | Introduction to Runge-Kutta methods for ODEs. |  |
|  |  | Solving systems of first-order ODEs. |  |
|  |  |  |  |
